vaso
rilia

RILIA is the new designer planter from the euro3plast Style Collection, created to accommodate olive trees, citrus trees, ornamental trees and plants. Measuring 92 cm in diameter and 57 cm in height, with a capacity of 318 litres, it features a low, wide and gently rounded profile. Its generous base and low centre of gravity provide **stability and visual balance**, while the rhythmic vertical grooves create an elegant interplay of light and shadow, adding movement and character to the surface.

Manufactured using rotational moulding, RILIA combines strength, durability and quality. Industrial precision and hand finishing enhance every detail, making each piece unique. Ideal for indoor and outdoor environments, from residential spaces to contract and HoReCa settings, RILIA withstands the elements and retains its colour stability and aesthetic quality over time, thanks to the use of high-quality raw materials.

Available in **White 67, Pearl Black 87, Rust E5, Creta V7 and Stone U4**, RILIA blends naturally into green landscapes and contemporary architectural settings.

Discover the solution created for landscape architects, garden centres and landscaping professionals, and design contemporary green spaces with the RILIA planter.
